PROFILE • ABOUT ME

Senior Data Engineer, DBA & BI DevOps Engineer with over 6 years of enterprise experience across financial services and telecommunications. Specialized in high-availability database administration, cloud migrations across Azure, AWS, and Oracle Cloud, and architecting automated DevOps data pipelines. Proven track record working alongside global consultancy firms (EY, Deloitte, IBM) to modernize legacy data platforms, manage Microsoft Fabric environments, and bridge cross-functional technical workflows.

WORK EXPERIENCE

Database Administrator (DBA) | Cepal Hellas Financial Services — Kalithea, Greece June 2025 – Present

- Spearhead database modernization by migrating legacy SQL Server databases to Azure SQL Managed Instances, leveraging Redgate for schema monitoring, performance tuning, and administration.
- Support multi-cloud strategy initiatives by facilitating database and workload transitions toward AWS and Databricks architecture.
- Administer the Microsoft Fabric ecosystem, overseeing workspace distribution and managing report deployments across business units.
- Engineered high-performing stored procedures for core web applications and streamline daily SSIS ETL execution to maintain operational stability for call center systems.
- Partner with cross-functional network, infrastructure, and security teams via Jira to enforce database governance and expedite operational workflows.

BI DevOps Engineer | OPAP SA — Athens, Greece Aug 2023 – May 2025

- Orchestrated the migration of legacy SSAS, SSRS, and file server ecosystems into modern cloud platforms across Azure Data Lake, Databricks, and Azure Synapse Analytics.
- Managed database administration and seamless data migration from an Always On High Availability 3-node SQL Server cluster into Azure Synapse SQL dedicated pools.
- Architected robust Azure DevOps CI/CD pipelines for Azure Synapse and Databricks in strategic partnership with EY and Deloitte consultancy teams.
- Administered hybrid cloud data warehouse infrastructure, including on-premise and Azure VMs, SSRS/SSAS servers, and Microsoft Fabric tenant configurations.
- Empowered Retail Analytics, Online Analytics, and Financial Reporting divisions by delivering analytics support across Tableau, Power BI, SSRS, and SPSS platforms.
- Mentored junior developers on BI operations, advised business stakeholders on query optimization, and resolved infrastructure requests using Jira.

BI Developer | Vodafone — Athens, Greece Nov 2019 – Aug 2023

- Served as core engineer on Project Phoenix, driving the enterprise data warehouse migration from SQL Server to Oracle Cloud in collaboration with IBM.
- Optimized complex SQL queries and structured ETL data transformations across multiple data sources to boost reporting speed and efficiency.
- Maintained Oracle DB instances, developed custom ASP.NET MVC5 data entry modules using Infragistics, and designed executive Power BI / Report Builder dashboards.
- Guided a team of 10 business analysts in Commercial Operations and conducted hands-on SQL and Power BI training for junior staff.

DBA | Benefit Software — Piraeus, Greece May 2016 – Feb 2017

- Administered MS SQL Server instances, performing routine maintenance, database migrations, and performance optimizations for client environments.
- Supported client applications via C# and Delphi patch deployments while building customized reporting dashboards on the BI Targit Platform.

SKILLS

Core Technical Skills: Azure Synapse Analytics • Azure Data Lake • Databricks • Microsoft Fabric • AWS • Oracle Cloud Infrastructure (OCI) • Azure SQL Managed Instance • SQL Server (Always On HA) • Oracle DB • Redgate Tools • Azure DevOps CI/CD • SSIS / SSRS / SSAS • Power BI • Tableau • SPSS • Python / R • Cmd / PowerShell Scripting • Jira Workflows • ASP.NET MVC5

EDUCATION & LANGUAGES

- **Master of Science, IT and Applications** — University of West Attica | Completed, December 2021 | Marks: 8 [CGPA]
- **Master of Science, Data Science** — American University of Greece | Completed, December 2020 | Marks: 3 [CGPA]
- **Bachelor, Electronics Engineering** — Piraeus University of Applied Sciences | Completed, December 2016 | Marks: 7%
- **Languages:** English | Greek
